7/20/71

PH, JHS Sorry about the delay in going over FBI's last 3rd-class mailing docs. Got up earlier than usual inhopes of getting done today.

CD75:115-3. If I have trouble believing this report, I also have trouble accepting the FBI investigation of it, and not alone in the brevity. I seem to have some recollection. But one of the obvious things missing is how the report from Ruth Dock reached the FBI. And, it is typical of a False Oswald setup. These two stations are close to LHO's address. I suspect there is a typo in the Wynn-Dixie address, that it is 490+ Prytania, which parallels Magazine and is close, I've forgotten how close. There was much rumor in that general area, some without doubt false, some checked inadequately, and what is no less troubling, some not checked at all. I am keeping, filing under Falso Oswald, H.O.
